FOX NEWS POLL

All results are for release 6:00 PM/ET Wednesday, September 2, 2020.

ARIZONA

Methodology

Interviews were conducted August 29-September 1, 2020 among a random sample of 853 Arizona voters contacted on landlines (214) and cellphones (639). Results based on the full sample have a margin of sampling error of ±3 percentage points.

A subsample of 772 has been defined as likely voters (LV), with a margin of error of ±3.5 percentage points.

Interviews were conducted by bilingual interviewers. Respondents were given the option of completing the interview in English or Spanish.

Telephone numbers were randomly selected from a statewide voter file of registered Arizona voters using a probability proportionate to size method, which means phone numbers are proportionally representative to the number of voters in all regions across the state.

The Fox News Poll is conducted under the joint direction of Beacon Research (D) (formerly known as Anderson Robbins Research) and Shaw & Company Research (R).

Fieldwork conducted by Braun Research, Inc. of Princeton, NJ.

Results are of registered voters, unless otherwise noted.
An asterisk (*) is used for percentages of less than one-half percent.
A dash (-) represents a value of zero.
Some percentages may not add to 100% due to rounding. In the same way, percentages in "total" columns may be one point more or less than the sum of their parts due to rounding.

1. How interested are you in the presidential election? Are you:

	Extremely	Very	Somewhat	Not at all	(Don't know)

Fox News Poll -- Margin of Error for Subgroups

The Fox News Poll is conducted under the joint direction of Beacon Research (D) and Shaw & Company Research (R). Interviews were conducted by telephone (landline and cellphone) with live interviewers August 29-September 1, 2020 among a random sample of 853 Arizona registered voters and 772 Arizona likely voters. Results based on the full sample have a margin of sampling error of plus or minus three percentage points. Results based on the likely voters sample have a margin of sampling error of plus or minus 3.5 percentage points.

Results among the attached subgroups have larger sampling errors:

	Registered Voters	Likely Voters
Overall	+/- 3%	+/- 3.5%

10. Some people say they are less likely to vote because they are concerned it might expose them to coronavirus. Others say they intend to vote no matter what. How about you -- how likely are you to vote in the presidential election on a scale from zero to 10, where 10 means you're certain you will vote and zero means there is no chance you will vote.
